

Using Different Languages in RamCT (RamCT Instructors/Designers)

By default, RamCT's display language is US English. RamCT does have the ability to show menus and tools in a number of different languages. These languages include:

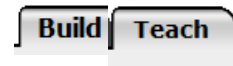

US English UK English Finnish French
German Japanese Spanish

Below are instructions on how RamCT instructors and designers can change the display language for a RamCT section or for an individual person. The language will change for the built in menus in RamCT; it will not change the titles of files or links that you have created. You must log completely out of RamCT for this change to take effect.
